

FIREPIT by Phil Aro for Hayes Street Design

## ORIGAMI FIREPIT

Mild before  
and after rust

COR-TEN™  
before and after  
rust

Stainless  
Brushed

Stainless  
Mirror

DIY ship-flat version (top photo) can be folded together by hand! No special tools required. Available in COR-TEN™ weathering steel. Shown is Phil assembling an early prototype - turns out bending it together was really fun! Like steel origami!

COR-TEN™ U.S. Steel

## FEATURES:

Designed for bright, flaring burns with low smoke

Wide horizontal lip around edge for s'more-melting and drink warmin'

Durable steel construction: 1/4" steel plate for fire grid, heavy gauge steel sheet shell and inserts, solid metal bar "fire basket"

Available in: Stainless steel brushed or mirror finish (outside surfaces), COR-TEN™ (or equivalent) which rusts evenly and attractively as a protective layer, or mild steel which rusts continuously with dramatic runs of color

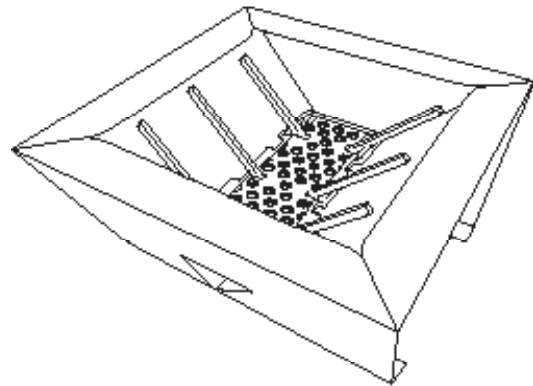

3 sizes (small is portably-sized and fits store-bought boxed firewood)

Options:

- BBQ grill set
- Spark arrestor screen
- "Deck-saver" anti-heat inserts

DIY version available!

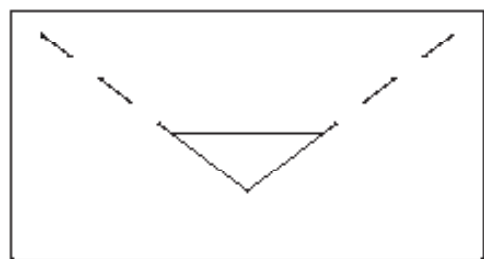

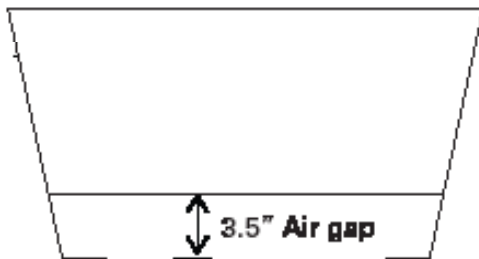

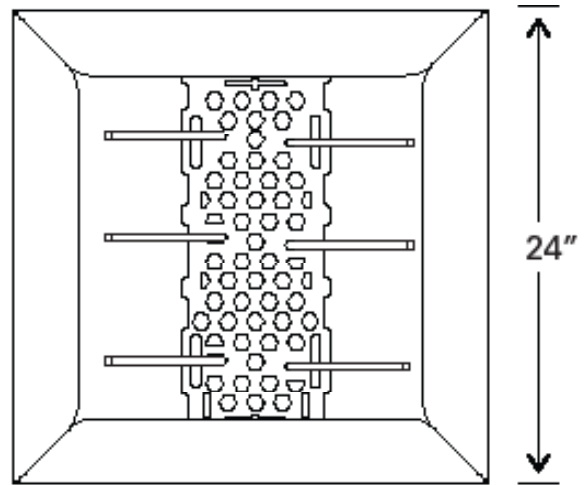

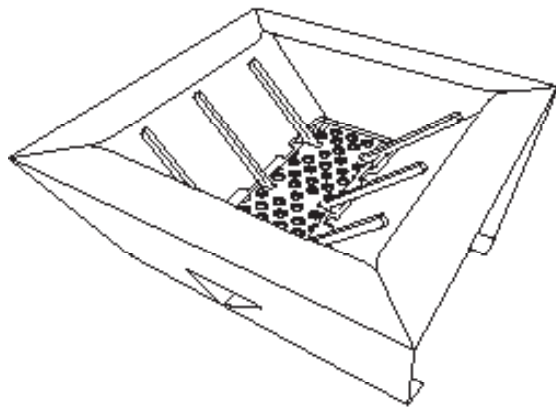

- Ships flat, then is easily folded together by hand
- Simple 4-part construction with sturdy interlocking tabs with holes for (included) screws.
- In COR-TEN™ (or equivalent) only
